

Winnebago LeSharo

The Way To Go

LeSharo

Whether you're going north, south, east or west, when you're driving a Winnebago® LeSharo, you know you're headed in the right direction.

In a LeSharo®, you have all the best virtues of an economy car, a van and a

motor home.

On the way to work, LeSharo gives you frugal fuel economy and sporty handling. On the way to the ball park, LeSharo gives you room to carry the whole gang. And on the way to adventure,

LeSharo gives you all the conveniences of a motor home.

Go with LeSharo. LeSharo goes well beyond the traditional role of a motor home. Its unique features fit the many ways you live and travel.

Evidence from recent research shows that people really do have a sixth sense. It is our sense of direction that guides us through confusing city streets or helps us choose the wilderness path that leads home.

Sixty years after its invention, we now take the traffic light for granted. Yet the traffic light's present design went through various starts and stops.

Initially, the amber light was shown to both the moving and stopped traffic. Motorists tended to rush through an amber light when it was switching to red and lurched out into the intersection in anticipation of the light turning green. But once the amber light was only shown to the moving traffic, the three light system was widely accepted.

In a novel experiment, the city of New York found an unusual way to use the three light system. Yellow allowed the north and southbound traffic to move. Red meant that all traffic should stop. And green signalled the east and westbound traffic to move. This system created such chaos that within three years it was dismantled and replaced.

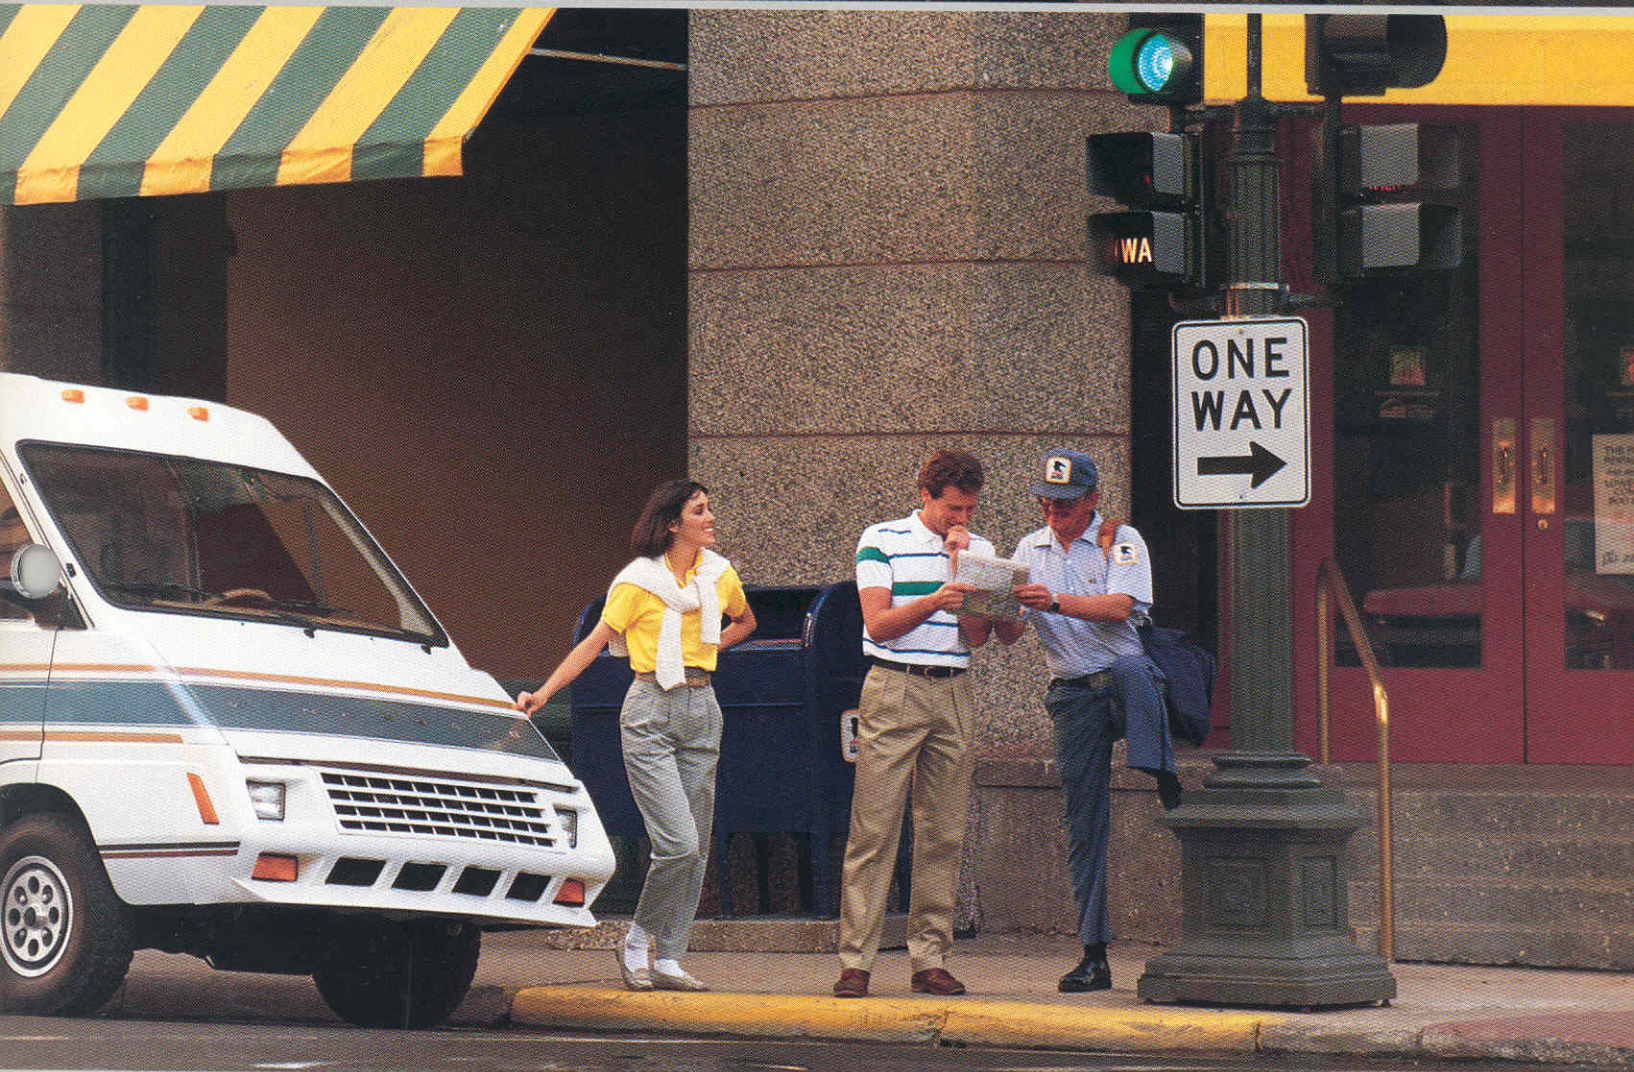

LeSharo 220RD

All The Right Moves.

A road can be more than just a way to get from here to there. Because in a LeSharo, you can turn

a road into an adventure. LeSharo gives impressive fuel economy. Its attractive, sleek sides

allow LeSharo to slip through the wind. And its efficient engine with speed transmission at

an economy once consid-
 (C) unachievable for a
 motor home.

LeSharo's advanced
 engineering, gives you a
 stirring performance. Its

front-wheel drive pulls
 you through turns. And the
 MacPherson struts and rack-
 and-pinion power steering
 give stability and controlled
 handling.

Surrounding the
 driver are such standard
 features as automotive air,

cruise control and AM/FM
 cassette stereo. And for
 additional driving ease, y
 can opt to have a 3-spee
 automatic transmission.

So no matter where
 you're headed, when you
 own a LeSharo, you've
 made the right move.

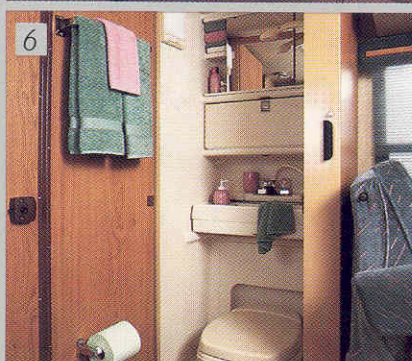

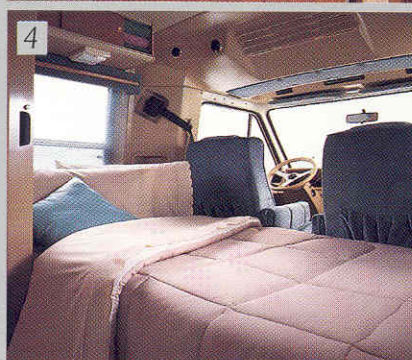

You're lost in the woods. The stars and moon are hidden by clouds. You can't remember where the sun set, and there's no clue as to where it might rise. And your compass is back in your dresser drawer. So what do you do?

Fortunately there are a number of ways you can use trees to find direction.

Because moss thrives best on indirect sunlight, it is most thick on a tree's north side.

By examining a cross-section of a tree, you will generally find that the rings will be wider and the bark will be thicker on the north and northeast sides.

And, because the south side is the warmest, spiders most often choose that side for their webs.

Finding Your Spot.

No matter where the road may take you, the Winnebago LeSharo has all the features you need to

make that place special. LeSharo's clever use of space creates plenty of seating for the crew and

plenty of room for hauling groceries and packages around town.

And all this is achie

1. 220RD galley. 2. Dinette becomes a wide, comfortable bed. 3. 220RD interior. 4. Companion chairs convert easily into a bed. 5. 220DD interior. 6. Space-saving, pull-out bathroom.

without making a sacrifice in comfort. The expanding bathroom gives you the conveniences of a lavatory and shower while maximizing your living space. The dinette and companion seats provide comfortable seating during

the day and convert easily into beds for a comfortable night's sleep. And to enhance the open feel of LeSharo's interior, there are wide windows and attractive mini-blinds.

LeSharo's galley is appropriate for a complete

meal. There's a refrigerator keeping your perishables and beverages cool and a 2-burner stove for cooking. There's even a flip-out galley extension.

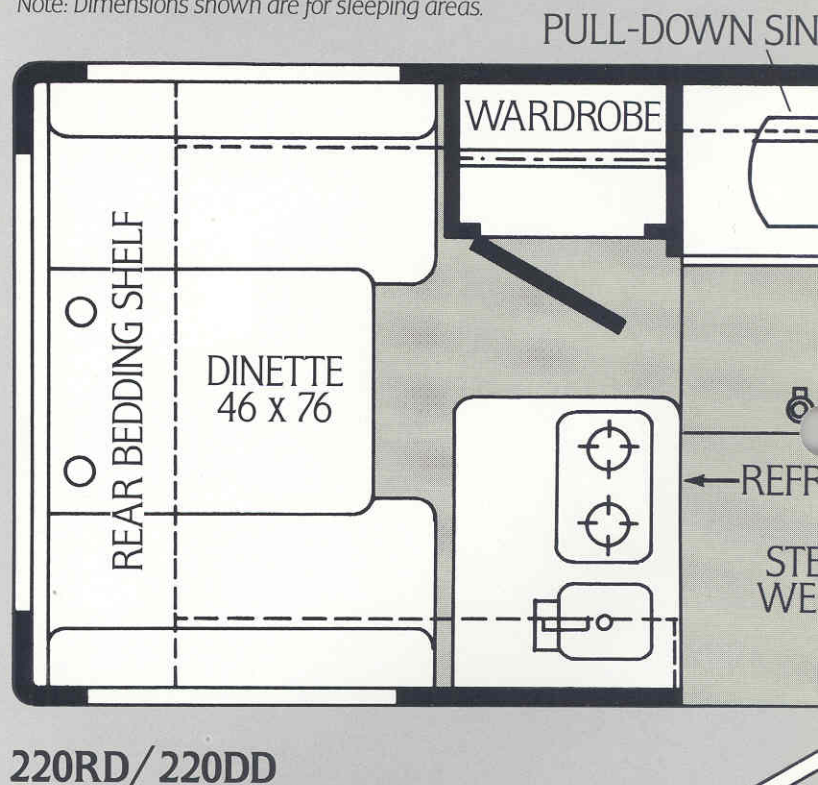

For checking LeSharo's systems, the deluxe monitor panel gives you

the status of your holding water and LP tank level. And this year, there's a standard grey-water holding tank.

Explore the LeSharo. Clearly, it's the perfect vehicle for finding your own special spot.

Note: Dimensions shown are for sleeping areas.

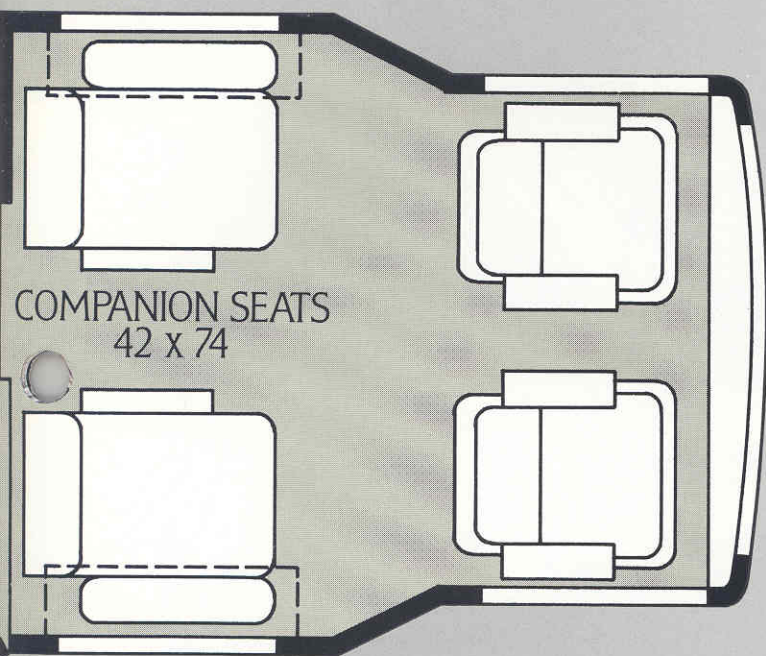

Choosing Your Path.

Choosing the right way to travel is easy if you have the right equipment. Just ask a LeSharo owner.

And now there's a new LeSharo. Introducing the LeSharo 220DD. The LeSharo 220DD has addi-

tional standard features and special Euro-styling for those who wish to travel with a special flair.

Whichever LeSharo you choose, you can travel the country with confidence. See your dealer for full details on Winnebago's nationwide service network, extensive warranty and optional traveler's protection plan.

And every LeSharo comes with its own price sticker which tells you the price of the motor home and each of its options.

Plus, owning a Winnebago also has its social benefits. One of those benefits is the

opportunity to join the Winnebago-Itasca Travelers Club. Club members receive special insurance plans, a mail forwarding service and a monthly newspaper. And each year members enjoy the many exclusive

caravans and rallies the club holds throughout the country.

Explore the many ways you can use LeSharo. Because no matter where on the map you choose to travel, LeSharo is the best choice to take you there.

While astrologers looked to the stars to guide their lives, travelers were finding that stars were far more accurate in guiding their travels.

In the Southern Hemisphere, Polynesians kept accurate charts of which stars passed directly over which islands. By following the stars, they were able to reach their destination.

In the Northern Hemisphere, Scandinavians recognized the lack of variation in the direction of the North Star and how its altitude related to the viewer's latitude.

But it wasn't until the use of the sextant that travelers were able to use the stars to accurately determine position rather than just direction. When used in conjunction with accurate timepieces and charts, the sextant's ability to measure the angle between a star and the horizon allowed you to determine an exact position.

Steel body is dipped in primer and sealant tanks to cleanse and rustproof.

Light, yet strong, aluminum frame around living areas.

Computer programmed load and stress analyses ensure proper balance and handling.

Unibody construction for strength and integrated design.

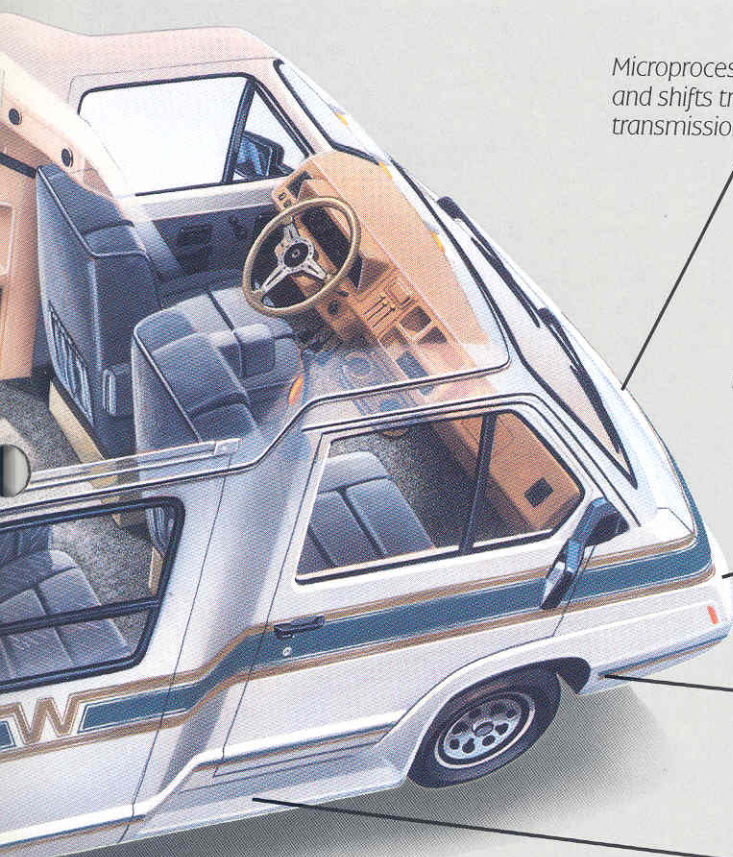

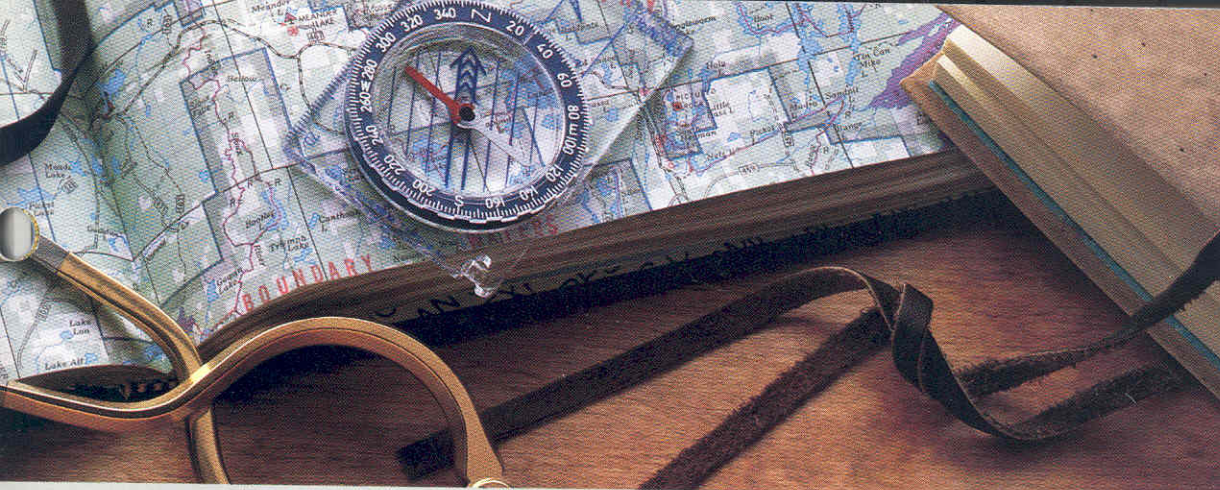

Water tanks are seamless and are strategically positioned for even weight distribution.

Electrostatically painted aluminum window and door trim.

For added safety, your generator is encased in a steel compartment.

Making It Without A Shortcut.

Microprocessor monitors engine speed and shifts transaxle of optional automatic transmission.

MacPherson strut front suspension.

Power assisted front-disc/rear-drum brakes.

Aerodynamic front end of steel, fiberglass and RIM urethane.

Front-wheel drive for improved efficiency and handling.

PVC rockguard coating applied to critical surfaces.

Non-hardening sealant throughout.

The first written communication wasn't words. It was maps. The survival of our early ancestors was dependent upon knowing the location of food, water and salt. Yet while early maps were always considered important, they were not always accurate.

It was an early map maker who, out of admiration for one of his favorite navigators, decided that the new-found continents should be called America.

It was a mistake in an early Greek map that led Columbus to believe that India was within easy reach by sailing west.

And these pioneers in cartography also helped feed their community's imaginations. Areas that were unknown were simply filled in with images of dragons, serpents and elephants, causing many to suppose that these were actual features of those areas.

Specifications

SPECIFICATIONS:

	220RD/DD
Standard Sleeping Capacity	4
Optional Sleeping Capacity (RD Only)	2
Length w/Spare	20'10"
Exterior Height w/Roof Air	8'3"
Exterior Width	7'4"
Interior Height (Max.)	6'0"
Interior Height (Normal)	5'8"
Fuel Capacity (Gal.)	15.5
Fresh Water Capacity (Gal. w/Heater)	22
Holding Tank Capacity (Gal. Main/Aux.)	13/5
LP Capacity (Lbs.)	28
GVWR (Lbs.)	6,677
Wheelbase	145"

STANDARD AUTOMOTIVE FEATURES:

Fuel-injected 2.2-Liter Gasoline Engine w/5-Speed Manual Transmission, Reclining Front Bucket Seats w/Armrests, 105-Amp. Alternator, 650-CCA Battery, Power Steering, Cruise Control, Automotive Air Conditioning, Oak Beverage Tray, Battery Condition Gauge, Headliner Pads, Front Wraparound Curtain, AM/FM Stereo w/Cassette, Cigarette Lighter, Dome Lights, Door Trim, Dual Battery Switch, Rearview Mirrors (Left, Right and Interior), Intermittent Windshield Wiper, Emergency Start Solenoid, Radial Tires, Front Wheel Drive, Sunvisors, Reminder Chimes (Ignition, Seatbelt and Headlights-On), Passenger Visor Light, Oil Level Gauge[†], Tachometer[†], Spare Tire, Tire Tools, Stylized Cast Alloy Wheels.

STANDARD APPLIANCES AND SAFETY FEATURES:

Direct Drive Water Pump, 2-Cubic Foot 12-Volt Refrigerator, 2-Burner Stainless Steel Hot Plate, 6-Gal. Electric Water Heater, 20,000-BTU Furnace w/Electronic Ignition, 5-B:C Fire Extinguisher, Deluxe Monitor Panel, LP Leak Tester.

STANDARD INTERIOR FEATURES:

2 Companion Lounge Seats w/Armrests, Stainless Steel Sink, 1 Powered Ceiling Vent, 1 Non-Powered Ceiling Vent, Double and Single Dome Lights, Courtesy Lights, 2 Recessed Beverage Holders and Ashtrays, Blinds w/Padded Window Valances, Drawer to Accommodate a Silverware Tray, Carpeting w/Pad,

Medicine Cabinet, Marine Toilet, Tissue Holder and Tower Bar, Lighted Wardrobe, Entrance Door Pull Shade w/Padded Valance, Convertible Dinette/Double Bed, Rear Bedding Shelf, Overhead Sliding Door Cabinets, Fold-Down Bath Shelf w/Storage, Shower (RD Only), Fold-Up Lavatory, Wooden Bath Door.

STANDARD EXTERIOR FEATURES:

Dual Battery System, Exterior Lamps, 32-Amp. Solid State Converter/Battery Charger, Rear Mud Flaps, Lockable Water Fill Door, Sewer Hose and Storage Compartment, 110-Volt Outlet, 30-Amp. Power Cord, LP Tank, Screen Door, All Tinted Windows, Body-Integrated Front and Rear Bumpers, Running Boards, Extensive Warranty.

ADDITIONAL 220DD STANDARD FEATURES:
